DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on **8/12/05** disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of the co-pending application **10/803,183** (*now a U.S. Patent No. 6,992,929*) has been reviewed and is accepted. The terminal disclaimer has been recorded.
2. **Claims 12 and 23** have been canceled according to the Election Response without traverse on **5/18/05**
3. Claims **1-11 and 13-22** are allowed over prior art.
4. The following is an examiner's statement of reasons for allowance:

Prior art, alone or in combination, fail to teach or suggest a structure of "flash memory cell array having a vertically stacked pairs of floating gates, and control gates arranged in rows above an active area wherein the control gates are positioned above and aligned with the floating gates and the select and erase gates are aligned with and positioned on opposite sides of the stacked gates. A common source region is in the active area beneath the erase gates and partially overlapped by the floating gates". This enhanced structure of array can reduce voltage required for an erase operation as well as increase a cell density.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
